COMPLEX TRAUMA & DISSOCIATION ACROSS THE LIFESPAN

Theory, Clinical Assessment and Stabilization

This conference offers a unique integration of approaches across the lifespan, from children to the elderly, providing clinicians with theory, clinical assessment skills, and stabilization strategies to support clients coping with the effects of early and chronic trauma. Clinicians attending will be able to identify how dissociation manifests in various stages of development as well as tools for stabilization, case conceptualization and treatment. The conference will close with a panel where participants can have a discussion with presenters.
